IMPROVE YOUR SCORE

with a

MIROKU
BROAD RIB

MODEL 800W
TRAP

\$425

You swing the gun up smoothly, leading the high one until your shot smashes the clay target cleanly.

So easy with a Stirling Miroku Over and Under. There's a feeling of excitement in the fine balance, the easy swing, the ready response of these guns. So many things about them will make fanatics out of casual clay shooters.

Finger the carefully wrought scroll engraving, the finely polished blued metal, the superb walnut stock.

Check these features: Exclusive hammer design permits equal percussion power on both barrels; the single selective trigger—recoil activated; powerful automatic ejectors; thumb safety slide that also serves as barrel selector; plus a grooved wide ventilated rib for instant sighting.

Why use a broad rib model?

Longer and level sighting plane stops head lifting and the heavier barrels keep you swinging—cures "gun stopping". Heavier weight reduces recoil and flinching. Broad rib stops miraging. Forward weight balance stops you jumping gun under pressure, gives you a steadier second barrel.

Since 1893, Miroku has been producing quality shotguns for countless sportsmen throughout the world. Although modern technology has greatly improved methods of production, it has not replaced the skilled craftsman so badly needed in the manufacturing of quality shotguns.

Craftsmanship is not an idle term for Miroku shotguns, but is meaningful in the construction and care with which each shotgun is made.

A Miroku shotgun will become one of your most prized possessions. It will serve you, your children and their children very well. What better investment can you make?

A warm and enjoyable day for our first shoot. Some sort of record must have been attempted when 36 shooters and their families consumed 22 dozen soft drinks plus a few dozen net so soft. Our Ladies' Trophy went to Mrs L. Graham. L. Dow took our high gun after an exciting shoot-off with J. Graham, who ran out of ammo and had to retire, both shooting 59:60 for the day.
